Derived from  
 Ammonium Nitrate CAS #6484-52-2,  
 Urea CAS #57-13-6,  
 Urea Triazone Solution CAS #7098-14-8  
 Tech Grade Phosphoric Acid CAS #7664-38-2,  
 Potassium Chloride CAS #7447-40-7,  
 Potassium Hydroxide CAS #1310-58-3

\* Slowly Available Nitrogen from Urea-Triazone Solution

**Green-T® 10-2-10, 50% SRN** is an excellent 1:1 Nitrogen to Potassium ratio fertilizer. This formula is ideal for foliar and root fertilization. 50% of the available nitrogen is slow release from Triazone, while the remaining nitrogen is in the quick release form. **Green-T® 10-2-10, 50% SRN** provides immediate plant response while the Triazone slow release nitrogen maintains the nitrogen release for an extended period of time.

- Weight per gallon: 10.0 lbs. (4.54 kg)
- Each gallon contains:  
 1.00 lb. Nitrogen  
 .20 lb. Phosphorous  
 1.00 lb. Potassium
- pH 8.5

### Directions for Use:

**Greens, Tees and Fine Turf:** Apply 10 - 15 oz. of **Green-T® 10-2-10, 50% SRN** per 1,000 sq. ft. (3.4 - 5.0 gallons per Acre) which equals .08 lb. - .12 lb. of actual Nitrogen per 1,000 sq. ft. per week with adequate water volume.

**Turf Application:** **Green-T® 10-2-10, 50% SRN** liquid fertilizer can be applied throughout the growing season. Applications should begin in early spring and continue through the fall at a rate of .12 lb. - .50 lb. of Nitrogen per 1,000 sq. ft. every 1-1/2 to 4 weeks as needed. Be sure to apply with adequate water volume.

**Green-T® 10-2-10, 50% SRN** is compatible with most technical materials when tank mixed with adequate water volume.

### Tank Mixing Information:

Prior to any fertilizer or pesticide application, all spray mixing and application equipment must be cleaned. A quality tank cleaner is recommended. Carefully observe all cleaning directions on the pesticide and fertilizer label. Fill the spray or mix tank at least 3/4 full of water and begin agitation. Add pesticides and/or fertilizers as directed by labeling or in the following sequence:

- 1) Dry flowables or water dispersible granules,
- 2) Wettable powders,
- 3) Flowables,
- 4) Emulsifiable concentrates,
- 5) Water based solutions,
- 6) Compatibility agents,
- 7) Micronutrients and Fertilizers,
- 8) Spray adjuvants

Before mixing multiple chemicals and/or fertilizers in the tank, confirm product compatibility by performing a jar test. Be sure to mix with plenty of water.

### Caution:

Keep away from children and domestic animals. Avoid contact with eyes, open cuts, or sores. Harmful if swallowed. External: Flood with water. Internal: Induce vomiting. Contact a physician immediately.

### Storage and Handling:

Store in a cool, dry place. Keep container tightly closed. Do not add water or other material to the container. Do not contaminate water, food, or feed by storage or disposal. Do not store near acids or other acidic materials.

### Available Container Sizes:

|             |              |      |
|-------------|--------------|------|
| 2 x 2.5 gal | (2 x 9.46 L) | Case |
| 30 gal      | (113.56 L)   | Drum |
| 55 gal      | (208.20 L)   | Drum |
| 275 gal     | (1040.99 L)  | Tote |

Store above 32° F. Do not allow to freeze.
