Directions for Use:

Soil Application: Always mix Plant Food Company, Inc.’s Boron 10% Liquid well to ensure even application in the field. Boron 10% Liquid may be applied broadcast, sidedress, through trickle or solid set irrigation, alone or in combination with other agricultural chemical and liquid fertilizers. Broadcast applications to the soil should not exceed one gallon per acre per application. Sidedress and trickle applications should be limited to no more than 2 quarts Boron 10% Liquid per acre per application. More frequent applications at lower rates throughout the season would be more effective.

Do not mix with Ag-Cal 10% Foliar Calcium

Foliar Applications: Apply Boron 10% Liquid with enough water to thoroughly cover foliage. Early morning or late evening applications give the best results. Boron is not translocated easily within the plant; therefore, multiple applications at lower rates throughout the season would be more effective.

Air Applications: Normal aerial application is one quart of Boron 10% Liquid in a minimum of 5 gallons of water per acre per application.

**SUGGESTED APPLICATION RATES PER ACRE**

**FIELD CROPS**

Alfalfa | 2-4 qts | 1-3 gals |
Beets (Sugar) | 2-4 qts | 1-3 gals |
Clover | 2-3 qts | 1-2 gals |
Corn | 1-2 qts | 1-2 gals |
Soybeans | 1-2 qts | 1-1½ gals |
Sunflowers, Wheat | 1-2 qts | ½-1 gal |

**FRUIT AND NUT CROPS**

Apples | 1-2 qts | 1-3 gals |
Grapes | 2-4 qts | 1-2 gals |
Pears, Cherries, Peaches, Plums, Prunes | 2-4 qts | 1-2 gals |

Before mixing multiple chemicals and/or fertilizers in the tank, confirm product compatibility by performing a jar test.

Tank Mixing:

Prior to any fertilizer of pesticide application, all spray mixing and application equipment must be cleaned. A quality tank cleaner is recommended. Carefully observe all cleaning directions on the pesticide and fertilizer label. Fill the spray or mix tank at least ¾ full of water and begin agitation. Add pesticides and/or fertilizers as directed by labeling or in the following sequence:

1) Dry flowables or water dispersible granules, 2) Wettable powders, 3) Flowables, 4) Emulsifiable concentrates, 5) Water based solutions, 6) Compatibility agents, 7) Micronutrients and fertilizer, 8) Spray adjuvant

Caution: Keep away from children and domestic animals. Avoid contact with eyes, open cuts, or sores. Harmful if swallowed. External: Flood with water. Internal: Induce vomiting. Contact a physician immediately. Wear goggles and gloves when handling.

Storage and Handling: Store in a cool dry place. Keep container tightly closed. Do not add water of other material to the container. Do not contaminate water, food, or feed by storage or disposal.

Store above 32°F. Do not allow to Freeze.

Guaranteed Analysis:

| Boron (B) | 10.00% |

Derived from Boric Acid

CAS # 12008-41-2

- Weight per gallon: 11.1 lbs. at 68º F
- One gallon contains 1.1 lbs. of Boron

General Information:

BORON is essential in the development and growth of new tissue and fruit set. Boron 10% Liquid is a readily available source of Boron. It may be applied in water or mixed with most Plant Food Company, Inc.’s liquid fertilizer, micronutrients or pesticides. Before mixing multiple chemicals and/or fertilizers in the tank, confirm product compatibility by performing a jar test. Be sure to mix with plenty of water.
