Green-T® 12-0-12, 50% SRN is an excellent balanced nitrogen to potassium ratio fertilizer that contains a full micronutrient package. This formula is ideal for foliar and root fertilization where no phosphate is required. 50% of the available nitrogen is slow release from Triazone, while the remaining nitrogen is in the quick release form. Green-T® 12-0-12, 50% SRN provides immediate plant response while the Triazone slow release nitrogen maintains the nitrogen release for an extended period of time. The micronutrients are in the EDTA chelated form which enhances their availability while in the soil and allows tank mix compatibility with many other products.
