

30-0-0, 60% SRN

Guaranteed Analysis

Total Nitrogen (N) 30.00%
 12.00% Urea Nitrogen
 18.00% Slowly Available Water Soluble Nitrogen*

Derived from Urea and Triazone

*Slowly Available Nitrogen from Urea-Triazone Solution.

Green-T® 30-0-0, 60% SRN is a clear liquid slow release nitrogen fertilizer. A total of 60% of the nitrogen is composed of slowly available urea polymers in the form of methylene urea and triazone. The remaining 40% is composed of urea. The nitrogen in **Green-T® 30-0-0, 60% SRN** is released in the soil over 60 to 90 days depending on soil type and climatic conditions. Microbial breakdown is required to release nitrogen from the urea polymers and this may be affected by soil temperature, moisture and oxygen concentration. **Green-T® 30-0-0, 60% SRN** was developed to have high stability when blended with certain formulations of phosphorus, potassium and micro-nutrients.

- Weight per gallon: 10.3 lbs. (4.67 kg)
- Each gallon contains: 3.09 lb Nitrogen
- pH: 9.2 - 10.2

Directions for Use:

Greens, Tees and Fine Turf: Apply 4.0 - 8.0 oz. of **Green-T® 30-0-0, 60% SRN** with 1.5 - 2 gallons of water per 1,000 sq. ft. (1.4 - 2.8 **Green-T® 30-0-0, 60% SRN** gallons of with 66 - 88 gallons of water per Acre) every 7 to 14 days throughout the growing season. Application may be made to either wet or dry foliage. This application shall provide 0.10 - 0.20 lb. of actual Nitrogen per 1,000 sq. ft.

Fairway, Roughs, Sports Turf and Lawns: Apply 2.0 - 4.1 gallons of **Green-T® 30-0-0, 60% SRN** with 44 - 88 gallons of water per Acre (6.0 - 12.0 oz of **Green-T® 30-0-0, 60% SRN** with 1 - 2 gallons of water per 1,000 sq. ft.) every 21 to 28 days throughout the growing season. This application shall provide 0.14 - 0.29 lb. of actual Nitrogen per 1,000 sq. ft.

Green-T® 30-0-0, 60% SRN may be used as the sole nitrogen source or combined with **Green-T® 12-3-12** in a fertilizer blend for application on fairways.

Lawn Care Program:

Cool Season Grasses: Rates may vary from 0.50 - 1.00 lb. of nitrogen per 1,000 sq. ft. in 4 to 5 applications at 8 to 12 week intervals throughout the growing season.

Warm Season Grasses: Rates may vary from 0.75 - 1.00 lb. of nitrogen per 1,000 sq. ft. in 5 to 6 applications at 8 to 12 week intervals throughout the growing season.

Trees and Ornamentals:

Deep Root Feeding: Deep root feeding applications may be made in either the spring or fall. Suggested rates of application are 1.6 - 3.2 lbs. of nitrogen per 1,000 sq. ft. (64 to 128 fl. oz.

Green-T® 30-0-0, 60% SRN). Inject the fertilizer solution eight to twelve inches deep on a grid pattern two to three feet apart so that the area beneath the tree canopy and one-third of the area outside the canopy is treated. See that plenty of water is added to your deep root feeding program.

Application Rates for Green-T® 30-0-0, 60% SRN

Fluid Oz/ 1,000 sq. ft.	Gallons/ One Acre	ML/ 100 M ²	L/HA Litre/ Hectare	Nitrogen/ 1,000 sq. ft.
4.0	1.4	127	13	0.10
6.0	2.0	191	20	0.14
